

To Whom it may concern:

March 10, 2015

We have been using Sirius chemical pumps for about 8 years and we use both solar 12 volt and 120 volt AC units really like the simplicity of the units, Jordan put on a lunch and learn which gave the operators a good understanding of the pump and the controllers, the confidence to work with them and the way they are packaged makes them easy to set up and move if needed.

We have been impressed by the innovation of Sirius they are always working to keep up to the demands of the field whether it's with better seals in the pumps, with more intuitive controllers or better 12 volt systems.

We have also had excellent support from Sirius and they have been receptive to all of our concerns and demands.
